

Find a Danish **Big Science**  
business partner

## A unique entry point into the Danish Big science industry

---

The Danish Big Science network is composed of companies offering high quality services and products matching the needs of Big Science organisations. Their skills and know-how cover a large range of sectors.

Members of the network are both SMEs and larger companies interested in doing business on the Big Science market, either as suppliers to Big Science facilities or as sub-suppliers to prime contractors.

At BigScience.dk, we help Big Science organisations and European companies find Danish suppliers for Big Science bids. Feel free to contact us to hear more about you opportunities with Danish companies.

## Four Reasons why Danish companies make good Big Science project partners

1. Trustworthy and efficient business partners. Danish companies are well known worldwide for their dependability and professional approach. On-time delivery, customer satisfaction, and high service standards are integral within the Danish business culture.
2. Experience from demanding sectors. Denmark has a large network of highly skilled subcontractors specialising in the development and production of advanced technological products to demanding sectors such as the offshore, wind power, defense, medico and aerospace industries.
3. The Danish Big Science Network. Denmark has a growing network of companies with outstanding solid experience as providers to the Big Science market, and offering products, services and knowledge covering many different areas that are relevant for Big Science facilities.
4. Denmark: an innovation leader. Denmark has traditionally, year-after-year, achieved top-10 rankings among leading countries in surveys rating industry and science innovation, IT-advancement, best education systems, and more.

### DANISH CASE STORIES

High-tech company assists in coating process for European super telescope

Software company delivers teaching resources for engineers at neutron microscope

Electronics manufacturer installs power supplies at particle physics research centre

Engineering consultancy becomes technical advisor for the World's largest telescope
